PERSPECTIVES IN BIOLOGY AND MEDICINE

VOLUME 39 · CONTENTS

1	Douglas Black	Health Care—A Business or a Service
15	Trudo Lemmens	Euthanasia and the Good Life
28	Charles E. Rosenberg	Banishing Risk: Or the More Things Change the More They Remain the Same
43	David Waltner-Toews	Changing Patterns of Communicable Disease: Who Is Turning the Kaleidoscope?
56	Michael O. Blackstone	Hypothesis: Vascular Compromise Is the Central Pathogenic Mechanism for Acute Hemorrhagic Pancreatitis
64	Joseph Herman	Aspects of our Present Understanding of Ischemic Heart Disease: More Answers Than Questions
77	Howard Gest	Arabidopsis to Zebrafish: A Commentary on "Rosetta Stone" Model Systems in the Biological Sciences
86	Richard Sobel	The Rusty Years: Sixteen Over Eighty
93	Frank G. Rothman and Allan L. Lorincz	Stephen Rothman, Pioneer of Investigative Dermatology
110	Robert S. Root-Bernstein	The Development and Dissemination of Non-Patentable Therapies (NPTs)
118	Van Rensselaer Potter	Global Bioethics: Linking Genes to Ethical Behavior
132	Allen B. Weisse	Tuberculosis: Why "The White Plague"?
139		BOOK REVIEWS: *How We Die: Reflections on Life's Final Chapter*, by Sherwin B. Nuland; *Fractal Physiology*, by R. B. Bassingthwaighte, J. B. Liebovitch, and B. J. West, Titles That May Interest You, by Ronald Singer
146	Bruce G. Charlton	OPINIONS OF OUR READERS: Is Immortality a Possibility? A Thought Experiment Concerning the Inevitability of Senescence Due to Endogenous Parasitism
150		LETTERS TO THE EDITOR: Steven Fleck, Richard E. Peschel, L. R. Karhausen
		MISCELLANY by Daniel J. McCarty, N. V. Mengel, Anne Shivas, Ronald Singer
157		Dwight Ingle Memorial Award
158	Chris Feudtner	A Disease In Motion: Diabetes History and the New Paradigm of Transmuted Disease
171	Donald S. Burke	Joseph-Alexander Auzias-Turenne, Louis Pasteur, and Early Concepts of Virulence, Attenuation, and Vaccination
187	Brandon P. Reines	Radiation, Chimpanzees, and the Origin of AIDS

193	Robert Sapolsky and Steven Balt	Reductionism and Variability in Data: A Meta-Analysis
204	Peter Smith	The Quality of a Table: A Cautionary Tale of Good Science
206	Renée C. Fox	Experiment Perilous: Forty-Five Years As a Participant Observer of Patient-Oriented Clinical Research
227	Richard J. Bing	Recollections of an Eyewitness
239	P. Unrau and K. Doerffer	Genes, Ethnicity, and Risk Assessment
248	Stephan Fuchs and Saundra Davis Westervelt	Fraud and Trust in Science
270	Warren J. Bilkey	Confusion, Fear, and Chauvinism: Perspectives on the Medical Sociology of Chronic Pain
281	Richard Grantham	An Alert For Authors and Readers of Translated Books
287	Jose Luis Rodriguez-Fernandez	Is "Sudden Illumination" the Result of the Activation of a Creative Center at the Human Brain?
308	Craig Blackstone, editor	It Has Been Said
		MISCELLANY by Lee Frank, David A. Bennahum
313	Alan G. Wasserstein	Death and the Internal Milieu: Claude Bernard and the Origins of Experimental Medicine
327	Howard B. Burchell	Ethics in Mid-Century Cardiovascular Research: Apologia
338	Jacques F. A. P. Miller	Uncovering Thymus Function
353	Holmes Rolston III	Immunity in Natural History
373	William Naso and Christian Vera	Did Socrates Have the Sacred Disease?
380	Douglas E. Price	Melville and Dismemberment: Obsession or Metaphor
394	Sidney F. Bogardus Jr. and Sumner C. Kraft	Alimentary Agony: Allergy and the Gut
405	Christopher Rembold	Could Atherosclerosis Originate from Defective Smooth Muscle Cell Death (Apoptosis)?
409	Howard I. Kushner and Louise K. Kiessling	The Controversy over the Classification of Giles De La Tourette's Syndrome, 1800–1995
436	Jack G. Chamberlain	The Possible Role of Long-Chain, Omega-3 Fatty Acids in Human Brain Phylogeny
446	Edward A. Crawford Jr.	Paul-Louis Simond and his Work on Plague

459		BOOK REVIEWS: *Understanding Aging* by Robin Holliday; *Blondes in Venetian Paintings, the Nine-Banded Armadillo and other Essays in Biochemistry,* by Konrad Bloch; *The Hungry Soul: Eating and the Perfecting of Our Nature,* by Leon Kass; *A Summer Plague: Polio and its Survivors,* by Toni Gould; *A Mathematician Reads the Newspaper,* by John Allen Paulos
471	Alastair Michell	Effective Blood Volume: An Effective Concept or a Modern Myth
491	Kenneth A. Rice	Mutability and Diversity in the Biological Sciences: A Pagan Perception of Nature
500	Vic Velanovich	Observations on the Physics of the Surgical Residency
507	Julio Sotelo	Multiple Viral Pathogenicity: Another Paradigm in Medical Research
514	S. C. Mitchell	The Fish-Odor Syndrome
527	Irvin M. Modlin and Gary P. Lawton	Observations on the Gallic Gastric Illuminati
544	H. V. Wyatt	It Has Been Said
547	Robert M. Sade and Mary F Marshall	Legistrothanatry: A New Specialty for Assisting Death
550	Alexander G. Bearn	Oswald T. Avery and the Copley Medal of the Royal Society
555	David Pyke	Peter Medawar and the English Language
569	Dan J. Stein	The Philosophy of Psychopathy
581	Morley C. Sutter	Assigning Causation of Disease: Beyond Koch's Postulates
593	James L. Gamble Jr.	Moving More Closely to Acid-Base Relationships in the Body as a Whole
601	M. L. Elks	Rituals and Roles in Medical Practice
610	James A. Marcum	The Discovery of Heparin Revisited: The Peptone Connection
